

M2 Touchscreen Control

M2 Readout for Optical Systems

Metlogix M2 control software provides a broad range of powerful, user-friendly functions on a compact, icon based touchscreen interface in place of the traditional control.

A Starrett optical projector with an M2 display offers a state of the art measurement system that is powerful, intuitive and exceptionally accurate.

Features & Specifications

- Clean and simple touchscreen interface with large icon buttons and intuitive operation
- Graphics rich display providing instant information on feature form, tolerances, and measurement data
- Coordinate display for X and Y linear axes and Q radius values for screen rotation
- Easy part alignment and datum functions
- Measure and tolerance these geometric features: point, line, angle, distance, radius, diameter
- As you measure, a part view is created in the feature view. Constructions between features such as distances and bolt hole pattern can be done by simple selections from the part view
- For repetitive part measurement, create a part program that will visually guide operators through part measurement
- Available optical edge detection provides better throughput and removes operator subjectivity
- Four different report forms that can be printed or exported to Excel, text files or to an SPC program
- M2 mounts and displays in either vertical or horizontal position
- Windows 7-based operating system enables flexible data export and interface capability with Windows® applications and enables fast, easy connection to printers and networks
